

Beautiful Food

Use the principles of good composition to create a plate arranged attractively with food, either haute cuisine or hot dogs.

Beautiful Food

Due via Email by Noon, Nov. 3rd

Precisely arrange a plate of food, and take one or more **high quality photos***, submitting them by email.

Consider the five compositional principles by Arthur Wesley Dow, opposition, transition, subordination, repetition, symmetry. Choose a plate that enhances the food, and the way it is laid out.

While I showed photos of fancy food in class, I think this might be more interesting if more common foods, even junk foods, were used.

Check out this site for a little more inspiration:

food/](http://www.viralnova.com/fancy-junk-food/)

Imitation crabmeat, Vienna sausage, creamed-style corn, bbq potato chips, cocktail sauce, and Old Bay.

***Photograph near a window, or soft ambient light, with a simple background surface.**

Please change the file name of your image to include your name and project title, something like, MichaelKbeautyFood01, MichaelKbeautyFood02, etc., for example.
